Title	Digital Raster Acquisition Project Eastern Ontario (DRAPE) 2014 Digital Elevation Model
Date	2015-11-18
Date type	Creation
Abstract	<p>The DRAPE 2014 DEM is a 2m raster elevation product that represents a generalized representation of both surface and ground features. The product was generated by an imagery contractor for the purpose of ortho-rectifying the DRAPE 2014 ortho-photography. Digital Raster Acquisition Project Eastern Ontario (DRAPE) ortho-photography was collected through a collaborative funding partnership for eastern Ontario. Contributing organizations include the Ontario Government, municipalities, Conservation Authorities, the private sector and the Federal Government.</p>
Purpose	<p>The DRAPE 2014 DEM is a 2m raster product that has been generated by an imagery contractor from the Raw LAS vector elevation dataset. The primary purpose for generating the DEM was to allow for the DRAPE 2014 imagery to be ortho-rectified by the imagery contractor. A proprietary 'steam rolling' algorithm was used to reduce raised surface features in the Raw LAS dataset. The DEM was delivered to MNRF as a derivative product as part of the imagery contract.</p> <p>It is important to note that the DEM does not represent a full 'bare-earth' elevation surface. While the 'steam-rolling' algorithm has allowed for some raised features to be reduced closer to 'bare-earth' elevations (e.g. small buildings, small blocks of forest cover), many features are still raised above ground surface, such as larger buildings, larger forest stands and other raised features. The product is being distributed in the original state delivered by the imagery contractor without modification.</p>
